OMT Medical Acupuncture COURSE CONTENT

OMT Training will introduce the participants of OMT Medical Acupuncture into the theoretical and practical principals of using Acupuncture techniques within a clinical setting for the treatment of a number of musculoskeletal conditions.

The training will look at the most effective techniques taken from both Traditional Acupuncture and current Western Acupuncture, giving the students a sound background of knowledge and skill to fully use OMT Acupuncture techniques within their own practice.

This Course Will Give Students The Following:

- Safe, Sound and effective background in the use of OMT Medical Acupuncture
- Traditional Chinese Acupuncture will be referenced by the lecturer but these will not be taught in depth.
- OMT Acupuncture will offer participants a fantastic new skill base with which they can use within their clinical practice.
- Discuss scientific evidence for the use of Acupuncture techniques
- Discuss current research for the use of Acupuncture
- Relate the use of Acupuncture to the treatment of acute and chronic pain, and for a number of musculoskeletal conditions.
- Give students a high level of safety, clinical competence and overall the confidence to use acupuncture techniques.

Please Note -

1. Course handbooks will be provided, and the content of the handbook will be underpinned by a structured PowerPoint presentation by the lecturers.
2. Students will be expected to take extra notes regarding areas and techniques that will require more specific explanation or detailed clarification.
3. The handbook and PowerPoint's are solely to be used as an aide memoire; the lecturers will adapt the content of the course depending on the student's backgrounds or therapeutic discipline.

4. Students are **ADVISED** to refresh their knowledge of relevant anatomy and physiology prior to attending the course, if students fail to show the required level of knowledge they can be asked to leave the course.
